

Hospital infections kill more Americans each year than AIDS, car accidents and breast cancer, well over 100,000.*

Doctors and nurses may clean hands or wear protective gloves coming into a patient's room, but they are recontaminated when opening or closing a privacy curtain.

Hospital room cleanliness is critical in preventing patients from contracting life threatening infections, yet the changing of cubicle curtains is often overlooked.

A study found that a high percentage of hospital curtains were contaminated with MRSA, VRE and C. diff.¹ Further study found that each of these organisms were transferred to the hands of hospital workers²; **it is clear that the cleaning of cubicle curtains to reduce the risk of infection is essential.**

VRE
 Vancomycin-resistant Enterococci (VRE) are antimicrobial-resistant bacteria that live in the intestines.

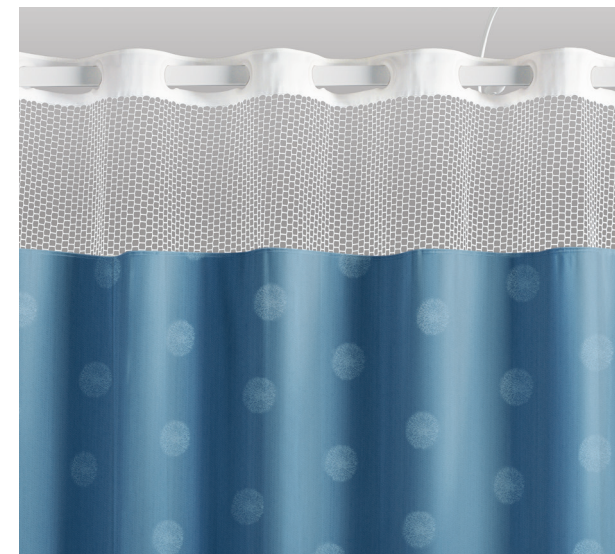

MRSA
 Methicillin-resistant Staphylococcus aureus (MRSA) is a bacterium that causes infection resistant to many antibiotics.

C. diff
 The Clostridium difficile (C. diff) bacterium, generally acquired in hospitals, causes inflammation of the colon.

Construction Specialties, Inc. holds a patent(s) on one or more of the products listed herein. For detailed patent information, see www.c-sgroup.com/patents.

ON THE RIGHT TRACK®

On the Right Track® gives you the best way to change curtains—fast!

Retrofit your existing track systems.

Avoid the hassle of removing existing track by installing our On the Right Track® Retrofit adapter.

With the exclusive Grabber Bar, your staff can remove or install curtains in seconds without the use of ladders. Simply place the grabber on the loading portion of the track, pull the hookless rings over the grabber and remove the curtain.

The quiet curtain & track system that allows you to remove curtains for cleaning in seconds

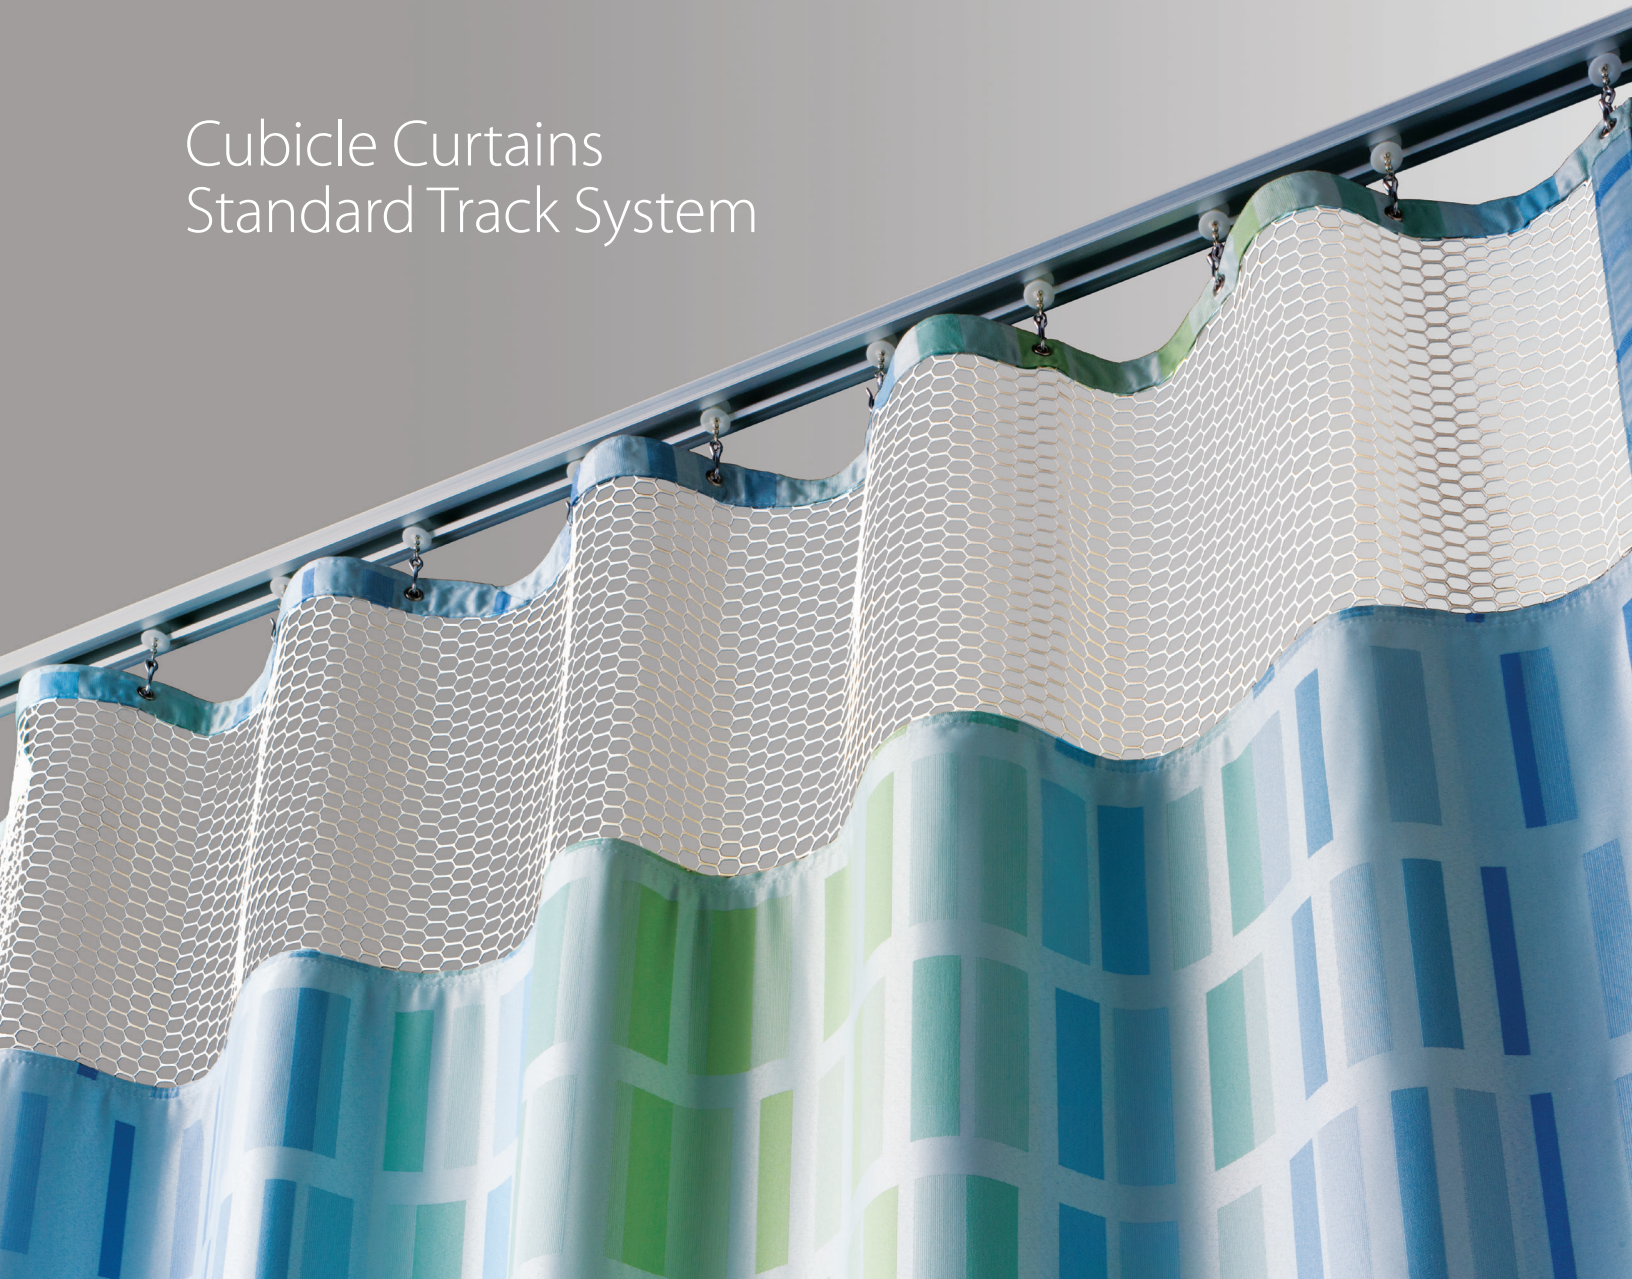

On the Right Track® patented hookless rings are the key to the system.

Features:

- Functionally designed curtain rings are integrated into the curtain fabric and designed to mount directly onto the straight or radiused track.
- The unique Grabber Bar tool allows for fast and quiet curtain changes.
- The system is perfect for new construction or existing facilities.

Cubicle Curtains Standard Track System

CS Cubicle Curtains offer a track system for every type of application.

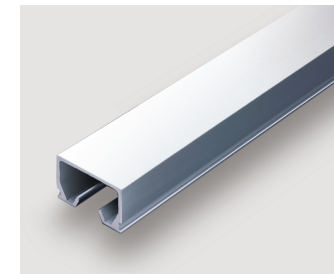

Since the early 1960s, CS Cubicle Track Systems have been the industry standard for excellence in privacy curtain track systems.

Manufactured from high quality aluminum extrusions, CS Track Systems including Qwik Switch™ (page 9) provide smooth, snag-free operation. Whether your application calls for surface mounting, straight or radiused run, CS Tracks are built to last.

Sing Pattern in Canopy by Maharam shown

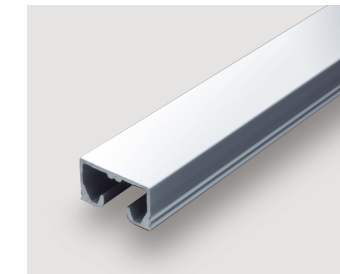

CUBICLE TRACK PRODUCTS

Surface Mounted Aluminum Track

Our snag-free, dual channel extruded aluminum track is 1-3/8" wide x 3/4" deep.

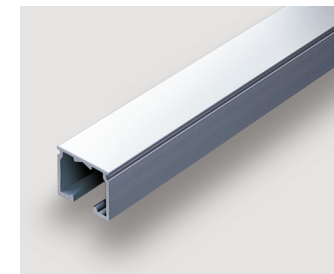

- Anodized Aluminum
- White Powdercoat

Surface Mounted I.V. Track

This track is manufactured exclusively for I.V. Pendants.

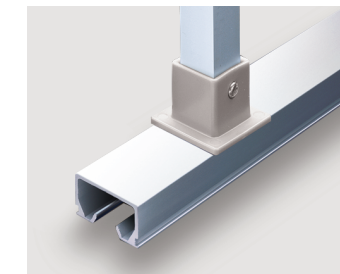

- Anodized Aluminum
- White Powdercoat

Narrowline Surface Mounted Track

Our new Narrowline anodized aluminum track is 29/32" wide x 11/16" deep. It also provides smooth, snag-free operation.

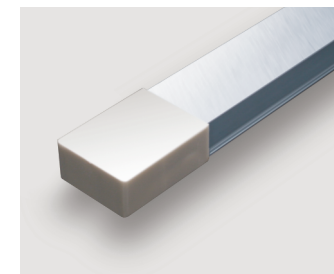

- Anodized Aluminum
- White Powdercoat

Suspended Mount Aluminum Track

This track includes 3/4" square aluminum hangers with suspension brackets and is generally set 7"3" from a finished floor.

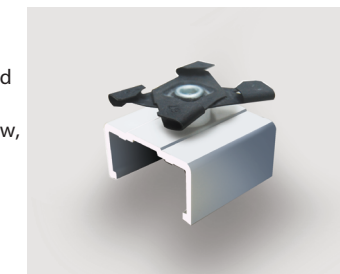

- Anodized Aluminum
- White Powdercoat

Carrier Gate

The carrier gate assembly is used at all curtain stacking points. Assembled with a machine screw, the carrier gate provides easy insertion or removal of carrier.

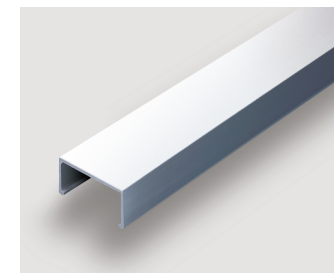

- Gray
- White

Grid Ceiling Clip

Our ceiling clips allow for quick and easy installation of the suspended mount aluminum track to horizontal tegular tile grids (T-Grids).

- Gray
- White

Splice

These 6" track splices are used where one-piece sections are not long enough or where radius and straight tracks connect.

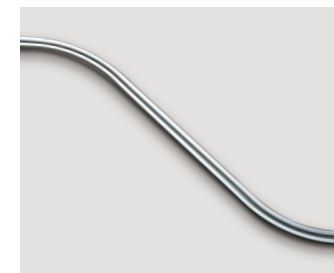

- Gray
- White

Carrier Stop

The carrier stop is used at the ends of curtain tracks or bends. Made of molded nylon or aluminum, our stops are finished to match the track color.

- Gray
- White

Offsets

Used to wrap track around the foot of the bed, the 30°-45° are supplied 2'x2' after the 12" radius. These can also be supplied in custom lengths.

- Anodized Aluminum
- White Powdercoat

Wall Socket

This component is designed to secure suspended mounted track systems to the wall and is finished to match the track color.

- Gray
- White

Cubicle Track Carriers and I.V. Pendants

General Carrier 1062N

Combines a nylon axle and a wheel with a nickel plated brass bead chain and polished aluminum hook

General Carrier 1075

A super smooth economical carrier manufactured completely from nylon including nylon axle wheels

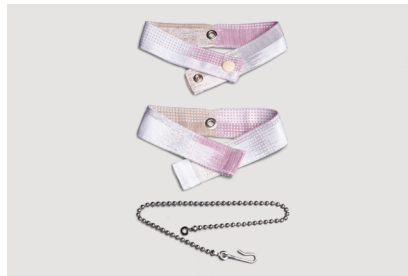

Spool Carrier SP062

Designed for use in any C-Channel curtain track. Manufactured from Nylon/Delrin®, these carriers provide fast, free movement.

Breakaway Carrier 1075P

For use in psychiatric institutions. The hook is designed to pop out of the axle when 8-10 lb of pressure are applied. This new carrier can be reassembled without removing it from the track.

Fabric Tieback

Available in a nickel plated bead chain finish or fabric to match the décor of your curtain. Lengths are fabricated to accommodate the width of the curtain.

Beaded Chain Drop

Available in nickel plated brass chain with an aluminum hook. In applications where NFPA* standards are required, this product can be used on curtains as a substitute for traditional nylon mesh.

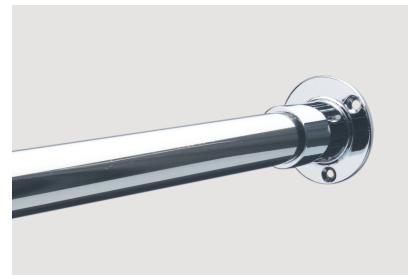

Twist Lock I.V. Carriage

Made of Celcon®, this locking I.V. carriage's shaft and hook are nickel chrome plated steel.

Deluxe 5 and 9 Bottle I.V. Pendants

Stainless steel models 17800 and 17150 telescope from 28" to 42". Folding arms hold 5 or 9 total bottles.

Shower Curtain Rod

Our 1" outer diameter stainless steel shower curtain rods provide a seamless transition for all types of shower grommets.

* National Fire Protection Association

For comprehensive information on these products, visit www.c-sgroup.com

Qwik Switch™

An easy way to change privacy curtains from the ground using our standard track system

Use in new construction or we can adapt your existing curtain track.

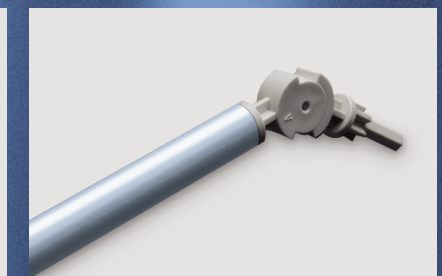

Qwik Switch Hinge

The Qwik Switch hinge allows the track system to pivot down for removing curtains from their carriers. Hinged sections of track are available in lengths up to 6' in a finish to match clear anodize.

Qwik Switch Latch

The Qwik Switch locking units, attached to the track end, lock onto the Qwik Switch latch, which is hard fastened directly to the ceiling. Latch is available in a finish to match clear anodize.

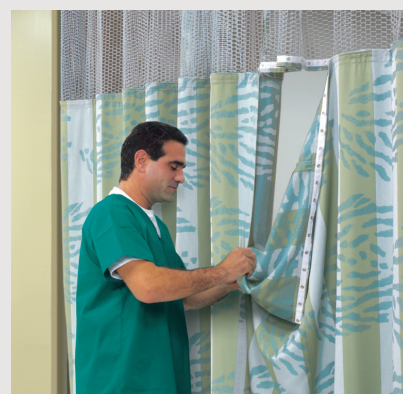

Qwik Switch Wand

With a simple turn of the 48" wand, staff can bring down a privacy curtain for laundering and easily put up a fresh curtain, all while standing on the floor.

Construction Specialties, Inc. holds a patent(s) on one or more of the products listed herein. For detailed patent information, see www.c-sgroup.com/patents.

Snap Lock

Because of its modular design, Snap Lock Curtains can be used in any patient room or any other area requiring privacy curtains.

A modular curtain system that simplifies inventory management

Features:

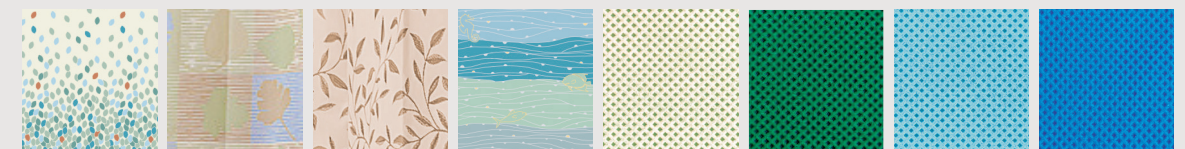

- Eliminates the hassles and dangers of removing cubicle curtains from ceiling-mounted track systems
- Enables hospital maintenance staff to change privacy curtains while standing on the floor
- Hospitals save money by not having to purchase custom or different size curtains.

Recyclable Curtain

An attractive yet economical solution for areas of high infection risk

- Look just like fabric curtains and are cost-effective when compared with the life cycle cost of traditional fabric curtains
- Manufactured from 100% recyclable material
- Available in both traditional solid colors and On The Right Track® patterns. (Color and pattern options vary by curtain type.)
- Available in a snap panel configuration for easy removal and replacement

CUBICLE CURTAINS

We manufacture the finest privacy curtains available anywhere.

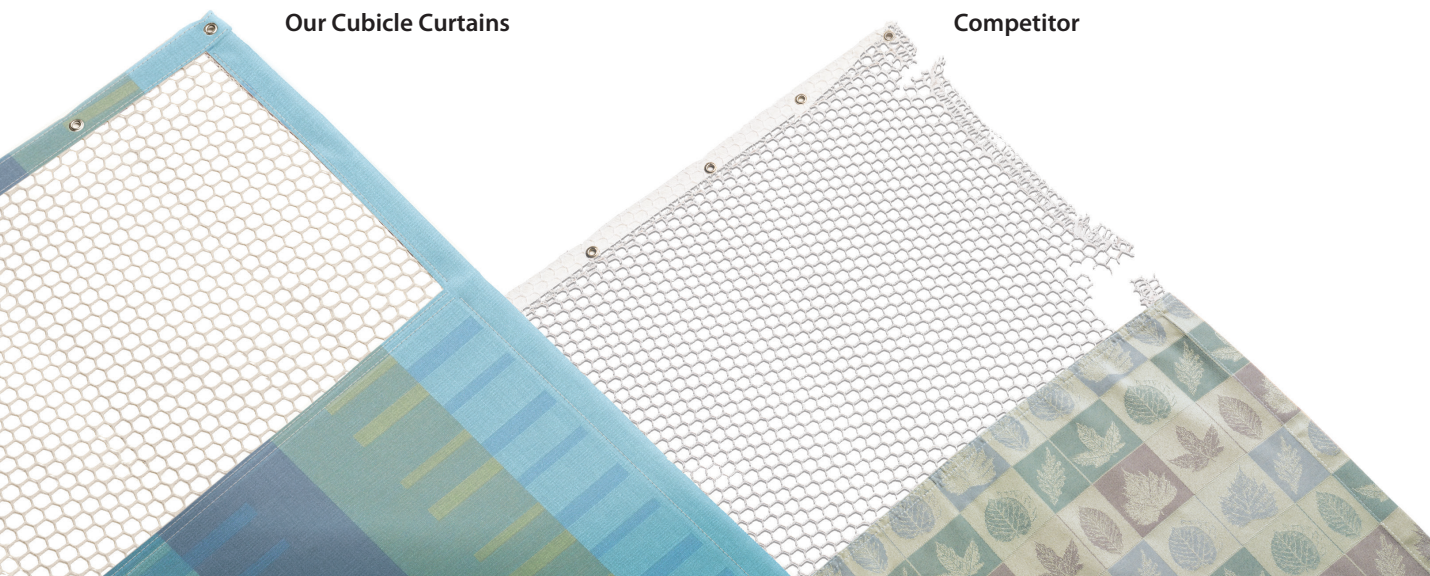

Quality makes the difference.

All Cubicle Curtains are manufactured using double-needle interlock tailoring. This process ensures durability, and the curtains will have a finished look on both sides where the nylon mesh meets the curtain.

The attention to detail on all our curtains is evident. All our privacy curtains feature double-needle interlock stitching for durability and a finished look. Additionally, all edges of **our nylon mesh are completely bound with the same fabric as the body of the curtain**, and the grommets at the top of the curtain are firmly anchored to triple thick hems for long life. **We also offer a complete line of color-coordinated nylon mesh that practically disappears into the curtain.** All our curtains meet the NFPA* flame resistance regulations for the use of privacy curtains in healthcare facilities.

* National Fire Protection Association

One look says it all!

CS offers the finest in curtain fabrics.

■
Pallas®

The most advanced protective treatment technology

Combining the high-performance spill and stain resistance of Nanotex® with the non-leaching antimicrobial bioAM®, this unique blended treatment is available upon request for application to any fabric. The special finish is ideal for healthcare privacy curtains where control of microorganisms is important. Nanotex with bioAM is extremely durable and fire resistant, and its application does not change the look or feel of the fabric.

** Minimum quantities and/or flat fees may apply depending on yardage required.*
