

BENCHES AND LEGS

This bench series, ideal for locker room spaces, offers a variety of design options and layouts. Made of resistant and durable materials, they are made to withstand all kinds of conditions in high-traffic areas, such as schools, municipal pools and other public spaces.

The metal bases /legs are available in two different models: in U shape and tubular legs. The bench surface made of stained oak, maple or soft maple with rounded edges, is designed to withstand the test of time and frequent usage and requires very little maintenance. When you choose to install these practical, safe and resistant benches, you're ensuring that your patrons are receiving quality service.

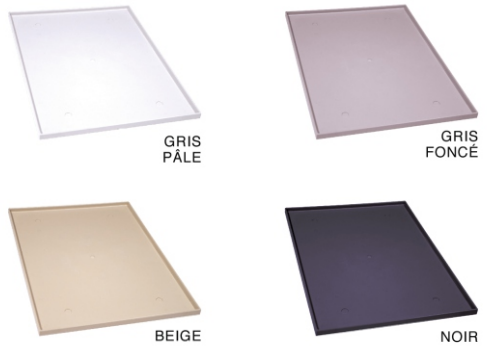

Benches and legs: The bench surface is available in many wood species, such as: Oak, Maple, Plaine, Cherrywood and Walnut.

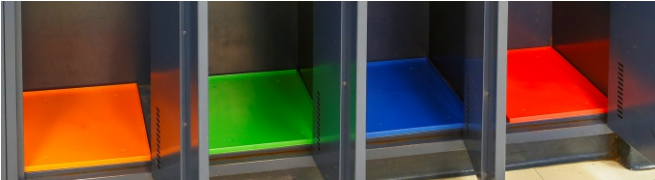

The legs can be sold separately and are available in aluminum, steel or painted
